Date: Friday September 08, 2017

## Weather Summary

Thunderstorms will begin to shift east on Saturday as drier air moves into northwest NV and southwest Idaho. These thunderstorms over the rest of the Great Basin will be on the wetter side, although heavier wetting rains will be more localized. RH should remain elevated. Gusty outflow winds 45-55 mph will still be a concern.

Drier weather pushes further east on Sunday with thunderstorms mainly confined to the southern half of the Great Basin.

However, thunderstorms may quickly push back north over western/northwest NV by Mon/Tue and to much of the Great Basin by Wed/Thu before drier weather returns. Thunderstorms look to be on the wetter side with wetting rains possible over the northern areas as well. However, we will continue to monitor the return of moisture.

### Preparedness Levels

Great Basin	4
National	5

Great Basin Fire Activity (from Irwin): Light Activity

New Fires and Acres: 17 fires for 239 acres; 3,597 acres large fire growth; 0 new large fire

#### Resources:

- Crews: 14 T1 IHCs in GB: 10 Committed, 4 Day Off.
- GBCC has committed an estimated 93+ Type 3, 4, 6 engines.
- 2-T1 and 5-T2 helicopters are available in GACC.

# Great Basin Fire Potential Summary

Despite some recent moisture, fuels in many areas will range from normal late summer dryness, to near record dry levels, with the driest fuels in the Central Idaho mountains down to northern Utah. As thunderstorms continue in these areas through Saturday, fuels will moderate in most areas somewhat, but will still likely remain above normal over ID, Western WY and parts of Northern NV/UT through early next week. Moisture will likely remain in place in the south with fuels continuing to moisten. Moisture may move into the west and north again by early to mid-next week, which may moderate the fuels, but confidence is low at this time.

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:

https://www.predictiveservices.nifc.gov/fuels fire-danger/GB Fuels and Fire Behavior Advisory.pdf
